

Hassan Umar

Sr. Software Engineer

Address Lahore 54000

Phone +92-331-4162023

E-mail hassanumar.lhe.pk@gmail.com

I'm a self-driven and results-oriented developer with a passion for crafting innovative solutions in mobile and web application development. With over four years of hands-on experience in MERN Stack and React Native development, I bring a wealth of expertise to any team.

What sets me apart is my commitment to excellence in every aspect of my work. From thoroughly planning sprints and managing teams to seamlessly integrating complex APIs and deploying polished builds, I ensure that projects not only meet but exceed expectations.

My ability to translate designs into market-ready code, coupled with my proficiency in data visualization and responsive web app and mobile development, makes me a versatile asset in any project. I thrive in fast-paced environments where I can continuously learn and adapt to new technologies.

If you're looking for a dedicated developer who can deliver exceptional results while fostering innovation and collaboration, I'm eager to bring my skills and enthusiasm to your team. Let's work together to create something extraordinary.

Top Skills

MERN Stack • Next.js • React Native • Cloud Services • Stripe (Software) • 3rd Party Integrations

Work History

2023-11 -
Current

Sr. Software Engineer

Droidor, Lahore

As a Senior Software Engineer skilled in MERN Stack development, I took on the challenge of creating and managing an innovative e-commerce platform with integrated CRM and affiliate management capabilities. From start to finish, I single-handedly led the design, development, and maintenance of this comprehensive system, leveraging my expertise to ensure its success.

2022-06 -
2023-11

Sr. Software Engineer

Maqware Solutions, Lahore

I joined Maqware Solutions as a Senior Software Engineer, specializing in MERN Stack development. Initially, my focus revolved around crafting robust web applications using React.js, Next.js, and Node.js. I

adeptly managed the integration of various third-party services and APIs, including Stripe for payments, Twilio for communication, and Auth0 for authentication.

Subsequently, I transitioned into leading a team of developers, steering our endeavors towards React Native for mobile app development. Throughout this phase, I honed my skills in:

- React Native Mobile App Development
- Web App Development with React.js and Next.js
- Backend Development with Node.js

2021-10 - **React | React Native Developer**

2022-05 AlphaSquad Technologies

- In AlphaSquad Technologies I worked as React and React Native Developer
- While working here I worked on different applications
- In some applications, I do tasks like maintenance and fixes
- I developed one application from scratch named as NFTBee which is the prototype for raising funds
- It has all the features like Instagram.

2020-06 - **React Native Developer**

2021-10 Droidor

- In Droidor my designation was React Native developer
- Here I worked on two applications the one I built from scratch and the second one I worked on suggested changes
- Also, I worked on a web project which I developed using HTML, CSS, and Bootstrap.

Skills
